

J. J. Keller's Driver File™ Software

J. J. Keller
& Associates, Inc.®
Since 1953

Managing driver qualification is time consuming and requires constant attention. What's more, if you don't keep your driver information up to date, you run the risk of allowing non-compliant drivers on the road.

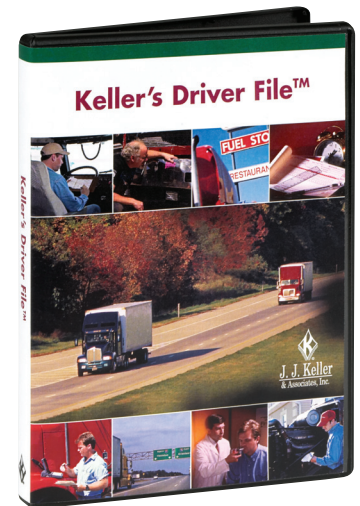

J. J. Keller's Driver File™ software can help you easily manage your driver qualification and help you stay in compliance. This timesaving software program automatically alerts you of employees who are not qualified to drive due to expired or missing driver qualification items, helping you steer clear of costly fines.

Driver File™ Software can help you:

- Streamline driver qualification tasks
- Identify driver compliance needs with homepage alerts of important information
- Centralize driver qualification information
- Maintain accident records
- Track training - including the new entry-level driver requirements
- Comply with the Safety Performance
- Utilize blank or pre-populated DOT driver forms

No more relying on Post-it® notes, spreadsheets or other manual systems to track critical driver information. Driver File™ does the work for you! Driver File™ is used by thousands of companies to qualify drivers, centralize information, stay in compliance and run safe and efficient operations.

To enhance your Driver File™ Software, integrate it with J. J. Keller's timesaving Log Checker® and Alcohol & Drug Testing Software for a suite of driver management tools.

Minimum System Requirements:

- PC with Intel® Pentium® processor or equivalent AMDT processor
- Windows® 2000, XP, or Vista 32-Bit
- 1 GB RAM
- HP LaserJet or compatible printer
- High Speed Internet Connection
- DVD Drive for Product Install
