

J. J. Keller's Alcohol & Drug Testing Software

J. J. Keller
& Associates, Inc.[®]
Since 1953

Efficiently organize, maintain, and report your DOT alcohol and drug testing records with J. J. Keller's Alcohol & Drug Testing Software.

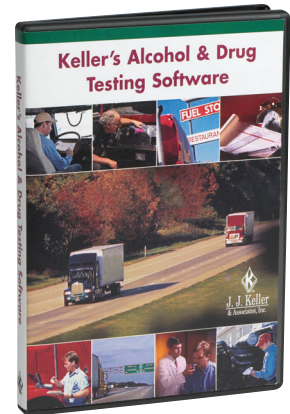

Managing random selection and alcohol and drug testing recordkeeping is time consuming. Following the regulations and understanding how to apply them can be very challenging. If you don't meet the random selection and testing requirements, you could be putting your company at risk.

J. J. Keller's Alcohol & Drug Testing Software helps you streamline your compliance program and simplify required recordkeeping procedures under DOT's Alcohol and Drug Testing regulation (49 CFR Part 382). The Alcohol & Drug Testing Software will manage your random selection and tracking results and complies with the DOT's requirement for "scientifically valid" random selection.

J. J. Keller's Alcohol & Drug Testing Software features:

- Homepage alerts of important driver information and a summary of key statistics.
- Generates management and DOT-required reports in minutes.
- Maintains confidentiality of sensitive information with multi-level password protection.
- Onscreen reminders for things like random selection display of current percentage of drivers who have been randomly tested.
- Ability to record, track, and report required information using DOT's Drug and Alcohol Testing MIS Data Collection Form.
- Access to applicable regulations and J. J. Keller's ez Explanations[®]

To enhance your Alcohol & Drug Testing Software, integrate it with J. J. Keller's timesaving Driver File[™] and Log Checker[®] software for a suite of driver management tools.
